Professional Summary

QA Automation Engineer with 7.8+ years of experience in product-based and consulting environments within the Banking and Core Payments domain. Strong expertise in end-to-end automation frameworks, ISO 20022 payment validation, message-driven systems (IBM MQ), CI/CD pipelines, and AI-assisted testing. Proven track record of delivering scalable, high-quality end-to-end automation while meeting regulatory and business requirements.

Core Technical Skills

- **Automation & Testing:** Java, JUnit 5, Selenium WebDriver, BDD, Cucumber, REST API, Postman, Playwright (Basic), Manual/UI & Acceptance Testing
- **Payments Domain:** ISO 20022 (Pacs, Pain, Camt), GPP SP Immediate Payments, SWIFT MT & MX, Clearing & Settlement
- **Messaging & Architecture:** IBM MQ (JMS), message-driven and workflow-based E2E automation
- **DevOps & Quality:** GitHub, Jenkins CI/CD, Azure DevOps, SonarQube, Nexus IQ
- **Databases & Tools:** SQL, SoapUI, IntelliJ IDEA, Splunk (SPL), WinSCP, PuTTY
- **AI & Modern QA:** Microsoft Copilot, GitHub Copilot, AI-assisted Automation

Professional Experience

QA Automation Engineer – Finastra (May 2022 – Present)

- Automated end-to-end ISO 20022 payment workflows using Java and JUnit 5, significantly reducing manual regression effort.
- Implemented message-driven automation using IBM MQ (JMS) for Payment message flows (PACS.008, PAIN.001, CAMT).
- Validated complete payment lifecycle states including VERIFY, WAIT_CONFIRMATION, COMPLETE, and REJECTED.
- Built workflow-based automation covering Fraud, Compliance, Account Lookup, Posting, and Settlement stages.
- Performed database-level validations for MID generation, posting entries, reversals, and error handling.
- Automated positive and negative test scenarios including duplicates, validation failures, and posting errors.
- Maintained updated scripts and test cases aligned with current requirements; monitored bug resolution, tested fixes, and provided QA support to developers.

- Documented testing procedures and assisted in creating user stories, use cases, and other related artifacts within Agile and Scrum frameworks.
- Actively supported defect triage, root cause analysis, and production issue validation in Agile/Scrum teams.
- Leveraged Copilot AI and GitHub Copilot to enhance automation processes and expand technical knowledge.
- Integrated test automation with CI/CD pipelines and enforced quality gates using SonarQube and Nexus IQ.
- Delivered on-time releases while meeting regulatory, customer, and quality benchmarks.

Associate Consultant – Capgemini (Sep 2018 – May 2022)

- Evaluated functional and non-functional requirements for automation in Cards and Payments domain.
- Maintained BDD-based automation frameworks using Cucumber and Page Object Model.
- Performed API, UI, and backend testing for enterprise payment systems.
- Reviewed logs, configuration files, and Splunk dashboards for issue analysis.
- Worked in Agile/Scrum teams to support consistent and timely deliveries.

Education

Bachelor of Engineering – Electronics & Telecommunications, Dr. D. Y. Patil Institute of Engineering, Pune (2018)

Certifications & Awards

- Oracle Certified Java SE 8 Programmer (IZ0-808)
- Generative AI Foundation Skilling
- Payments Onboarding Boot Camp (2022)
- OWASP & Secure Code Training (2021)
- Stronger Together Award (2025)
- The Budding Star – Make Data-Informed Judgments (2024)
- Good Team Player – Inclusion for All (2023)
- Star of the Month (2022)
- Rising Star (2021)
